Systems at Work - Systems at Work by USPS 1,065,051 views 10 years ago 9 minutes, 23 seconds - Each day the United States **Postal**, Service processes hundreds of millions of pieces of **mail**, and delivers to over 150 million ...

hundreds of millions of mail pieces every day

The Postal Service delivers almost half the world's mail through a network of thousands of post offices.

Processing and Distribution Centers around the nation.

The Postal Service separates mail into three categories letters, flats, and packages.

Processing letters begins with culling

Letters then enter the Advanced Facer-Canceller System.

The letters are then transferred

Postal workers feed the letters

This machine sorts letters into \"delivery point sequence,\"

After letters are sorted

Large bundles of flats must be weighed and verified

The flats travel along a conveyor system to a feeder

A high-speed camera captures images of flats

A computer interprets the scanned addresses

Sorted flats are then transferred to trays

The Automated Package Processing System

As the packages enter the scanning and imaging tunnel

It determines the package dimensions...

updating the package's tracking information.

drivers deliver the sorted mail

postal workers separate it for pickup.

Carriers gather the sorted letters, flats, and packages

Mail delivery connects people and businesses
