Introduction: oncogenes, tumor suppressors, hallmarks - Hallmarks of **cancer**, tumor-suppressors, ...

The Hallmarks of Cancer: A Framework for Understanding Cancer Biology Bob Weinberg and Douglas Hanahan wrote a Cal review in 2000 titled The Hallmarks of Cancer that attempted to characterize what differentiates a tumor from a normal cell. They summarized the acquired capabilities of cancer in six different categories and four new ones in 2011

The multiple avenues of tumorigenesis • Multiple pathways for a tumor to achieve self- sufficiency Oncologists often differentiate between driver and passenger mutations . 'Driver' mutations confer an advantage to the growth of the tumor • 'Passenger' mutations do not directly contribute to the fitness of a tumor

p53 as an example of a tumor-suppressor • Tumor Protein 53 (63) serves as a tumor suppressor that is commonly known as \"guardian of the genome\" serves as a key link between DNA damage and

repairapoptosis. • Mutations cause loss-of-function and promotes tumor emergence and growth.
